

BRAKENHALE SCHOOL, BRACKNELL

Hives acted as project architect and lead designers for the contractor in this design and build school extension. The construction was steel frame with an external brick leaf and light steel framing internally. There was a significant amount of co-ordination required between all the design team. The resulting extension created a large open plan room to the ground floor that the school plan to use for events. This can also be divided by a 7m wide acoustic screen. Two additional classrooms were added to the first floor and the layout adjusted to allow better circulation. The resulting extension is a series of bright and usable spaces.

CLIENT
DAWNUS CONSTRUCTION

GROSS INTERNAL AREA
260m² extension.

CONTRACT VALUE
n/a

RIBA STAGES
Stages 3-7

PLANNING DATE
June 2014

COMPLETION DATE
September 2015
